

# CP603448

## Electrical characteristics

Typical values relative to cells stored for one year

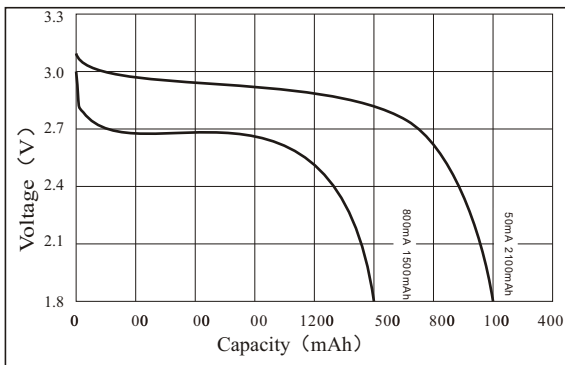

Nominal capacity (Discharged capacity at 0.5mA, +25°C, 2V cut off)	2300mAh
Nominal voltage	3.0V
Max.recommended continuous current Discharged to 2V at +25°C permitting 50% of the Nominal capacity to be achieved	1200mA
Max. Pulse current 15 seconds at 25°C drained with 50% of the nominal capacity, yield voltage reading above 2V. The value may vary with the pulse characteristics, the temperature and the cell's previous history.	2500mA
Storage	Max 30°C
Operating temperature range	-40~+60°C
Weight	≈18g

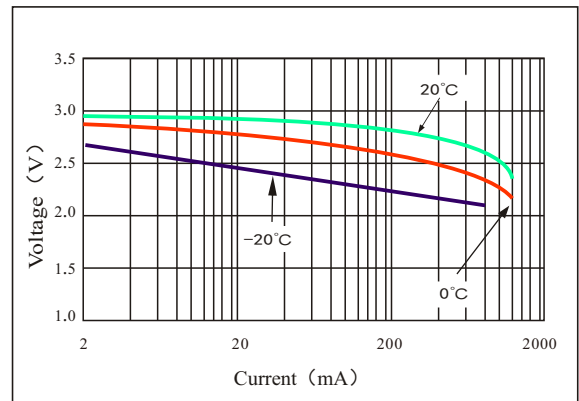

Dimensions in mm

Special terminal can be made according to customer's requirement
